REASONS FOR ALLOWANCE

9. The following is an examiner's statement of reasons for allowance:

The cited prior arts taken alone or in combination fail to teach, in combination with other claimed limitations, resetting the trigger count value according to the trace count value while the buffer is full, resetting the tracing value with the initial value as recite in the independent claim 1.

The closest cited prior art, Augsburg et al. (US 6,826,747 B1), teaches a method for real-time instruction information tracing when a microprocessor runs a program comprising a plurality of specific instructions. However Augsburg et al. (US 6,826,747 B1) fails to teach resetting the trigger count value according to the trace count value while the buffer is full, resetting the tracing value with the initial value as recite in the independent claim 1, also as pointed out by applicant's remarks on page 6.

These claimed limitations are not present in the prior art of record and would not have been obvious, thus the pending claims 1-9 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
